ICISS is a premier international conference on information security. The conference provides a forum for researchers and industry practitioners of security to present their cutting-edge research and use-case experiences.

This year's edition of ICISS has 28 research papers that are peer-reviewed by our esteemed Program Committee and each paper has received around 4 reviews. Also, there are 5 demos selected from industry track and 9 submissions selected for poster presentation from PhD Forum track. The attendees will benefit from 3 excellent tutorials lined up. The technical program of the conference is enriched with the following 4 Keynote & Invited Talks from the leading experts from academia and industry.

1. hinTS: Threshold signatures with silent setup
   Sanjam Garg, UC Berkeley
2. How to train and use AI models on sensitive data without compromising privacy?
   Nishanth Chandran, Microsoft Research
3. Follow the money
   Thomas Silkjær, XRP Ledger Foundation
4. Covert & side stories: Threats evolution in traditional and modern technologies
   Mauro Conti, University of Padua & TU Delft
